

--Question Starting--

1. In the context of telemedicine and e-health, which of the following factors are considered barriers to access in remote areas?

- I. Limited internet connectivity
- II. High costs of technology
- III. Uniform healthcare policies
- IV. Lack of local healthcare providers

Choose the correct answer from the options given below:

- (1) I and II only
- (2) II and III only
- (3) I, II, and IV only
- (4) All of the above

Answer Key: 3

Solution:

Statement I (Correct): Limited internet connectivity is a significant barrier in remote areas.

Statement II (Correct): High costs of technology can prevent the adoption of telemedicine.

Statement III (Incorrect): Uniform healthcare policies do not necessarily account for regional disparities.

Statement IV (Correct): The absence of local healthcare providers makes e-health a crucial service.

Hence, the correct answer is Option (3).

--Question Starting--

2. Which of the following are examples of iatrogenesis as discussed in Ivan Illich's Medical Nemesis?

- I. Adverse reactions to prescribed drugs
- II. Increased healthcare costs
- III. Surgical complications
- IV. Health improvements

Choose the correct answer from the options given below:

- (1) I and II only
- (2) II and III only
- (3) I, II, and III only
- (4) All of the above

Answer Key: 3

Solution:

Statement I (Correct): Adverse reactions to drugs are a direct form of iatrogenesis.

Statement II (Correct): Increased healthcare costs can be an indirect form of iatrogenesis.

Statement III (Correct): Surgical complications are a direct form of iatrogenesis.

Statement IV (Incorrect): Health improvements are not considered iatrogenesis but are intended outcomes of medical intervention.

Hence, the correct answer is Option (3).

--Question Starting--

3. Considering the outcomes of the Green Revolution, which of the following are recognized impacts on agrarian societies?

- I. Increased use of chemical fertilizers
- II. Reduction in crop diversity
- III. Decrease in smallholder viability
- IV. Enhanced traditional farming techniques

Choose the correct answer from the options given below:

- (1) I and II only
- (2) II and III only
- (3) I, II, and III only
- (4) All of the above

Answer Key: 3

Solution:

Statement I (Correct): The Green Revolution led to an increased use of chemical fertilizers.

Statement II (Correct): There was a significant reduction in crop diversity due to high-yielding variety seeds.

Statement III (Correct): The viability of smallholders decreased as large-scale farming became more dominant.

Statement IV (Incorrect): Traditional farming techniques were often replaced, not enhanced.

Hence, the correct answer is Option (3).
