

--Question Starting--

1. Consider the following statements related to care work, embodiment, and affect:

I. Care work is often undervalued in economic terms despite its crucial role in societal well-being.

II. Embodiment in care work involves both physical and emotional labor, reflecting the relational nature of care.

III. The affective dimension of care work can lead to emotional burnout if not managed effectively.

Which of the following is correct?

- (1) I and II only
- (2) II and III only
- (3) I and III only
- (4) All of the above

Answer Key: 1

Solution:

? Statement I (Correct): Care work, including tasks like child care, elder care, and personal assistance, is essential but often lacks monetary recognition compared to its societal importance.

? Statement II (Correct): Embodiment in care work signifies the incorporation of physical presence and emotional engagement, necessitating a deep interpersonal connection and understanding.

? Statement III (Incorrect): While it is true that the affective dimension can lead to burnout, the statement is too absolute as effective management and supportive environments can mitigate these effects significantly.

Hence, Option (1) is the right answer.

--Question Starting--

2. Analyze these statements about disability, accessibility, and embodied citizenship:

I. Accessibility in public spaces is a critical component of ensuring the rights of disabled individuals to participate fully in society.

II. Embodied citizenship emphasizes the need for societal structures to adapt to the diversity of bodies rather than bodies needing to adapt to pre-existing structures.

III. Technological advancements have completely eliminated the barriers faced by individuals with disabilities in accessing public spaces.

Which of the following is correct?

- (1) I and II only
- (2) II and III only
- (3) I and III only
- (4) All of the above

Answer Key: 1

Solution:

? Statement I (Correct): Accessibility is fundamental in enabling disabled individuals to exercise their rights and engage in societal activities, aligning with principles of inclusive design and universal access.

? Statement II (Correct): Embodied citizenship argues for a paradigm shift in which societal infrastructures are designed inclusively from the outset, recognizing diverse physical and sensory experiences.

? Statement III (Incorrect): Despite significant technological improvements, numerous physical and digital barriers still exist, and their complete elimination remains a challenge.

Hence, Option (1) is the right answer.

--Question Starting--

3. Evaluate the following statements regarding digital bodies: filters, selfies, and surveillance:

I. The use of filters in digital selfies can challenge traditional notions of beauty and identity.

II. Selfies can serve as a form of self-expression and empowerment, particularly in marginalized communities.

III. Comprehensive surveillance systems ensure complete privacy and security for individuals in digital spaces.

Which of the following is correct?

- (1) I and II only
- (2) II and III only

(3) I and III only

(4) All of the above

Answer Key: 1

Solution:

? Statement I (Correct): Digital filters can allow users to experiment with and redefine personal and cultural concepts of beauty, often pushing against mainstream and standardized beauty ideals.

? Statement II (Correct): Selfies are a powerful tool for self-representation, especially for those in marginalized groups, providing a platform for visibility and voice in broader social narratives.

? Statement III (Incorrect): While surveillance can sometimes enhance security, it often raises significant concerns about privacy infringement and can lead to excessive monitoring and data collection without adequate safeguards.

Hence, Option (1) is the right answer.
